Coloured Glazed Bricks

USE: Bricks for External and Internal Façades

Coloured glazed bricks combine the material character of terracotta with a durable glazed surface, offering architects a broad palette of colours and finishes for internal and external façades. The bricks are twice fired, with a second high-temperature firing that fuses finely crushed coloured glass to the surface and creates a hard, resistant finish.

This specialist glazing process allows a wide variety of appearances, from bright gloss tones to more understated matt and metallic finishes. Available in different colours, formats, and special shapes, including project-specific RAL shades, the range gives architects flexibility in creating distinctive façade styles, feature areas, and detailed architectural elements.

Key Features

Durable and strong due to their second stint in the kiln, glazed bricks have a longer lifespan than traditional bricks and their colour won't fade.

Patterns can be created by combining shapes or angles of bricks that, once assembled, create a variety of finishes depending on the chosen style.

Bespoke shapes and special shapes available.

Glazed bricks are easy to maintain, with their smooth surface making them simple to clean.

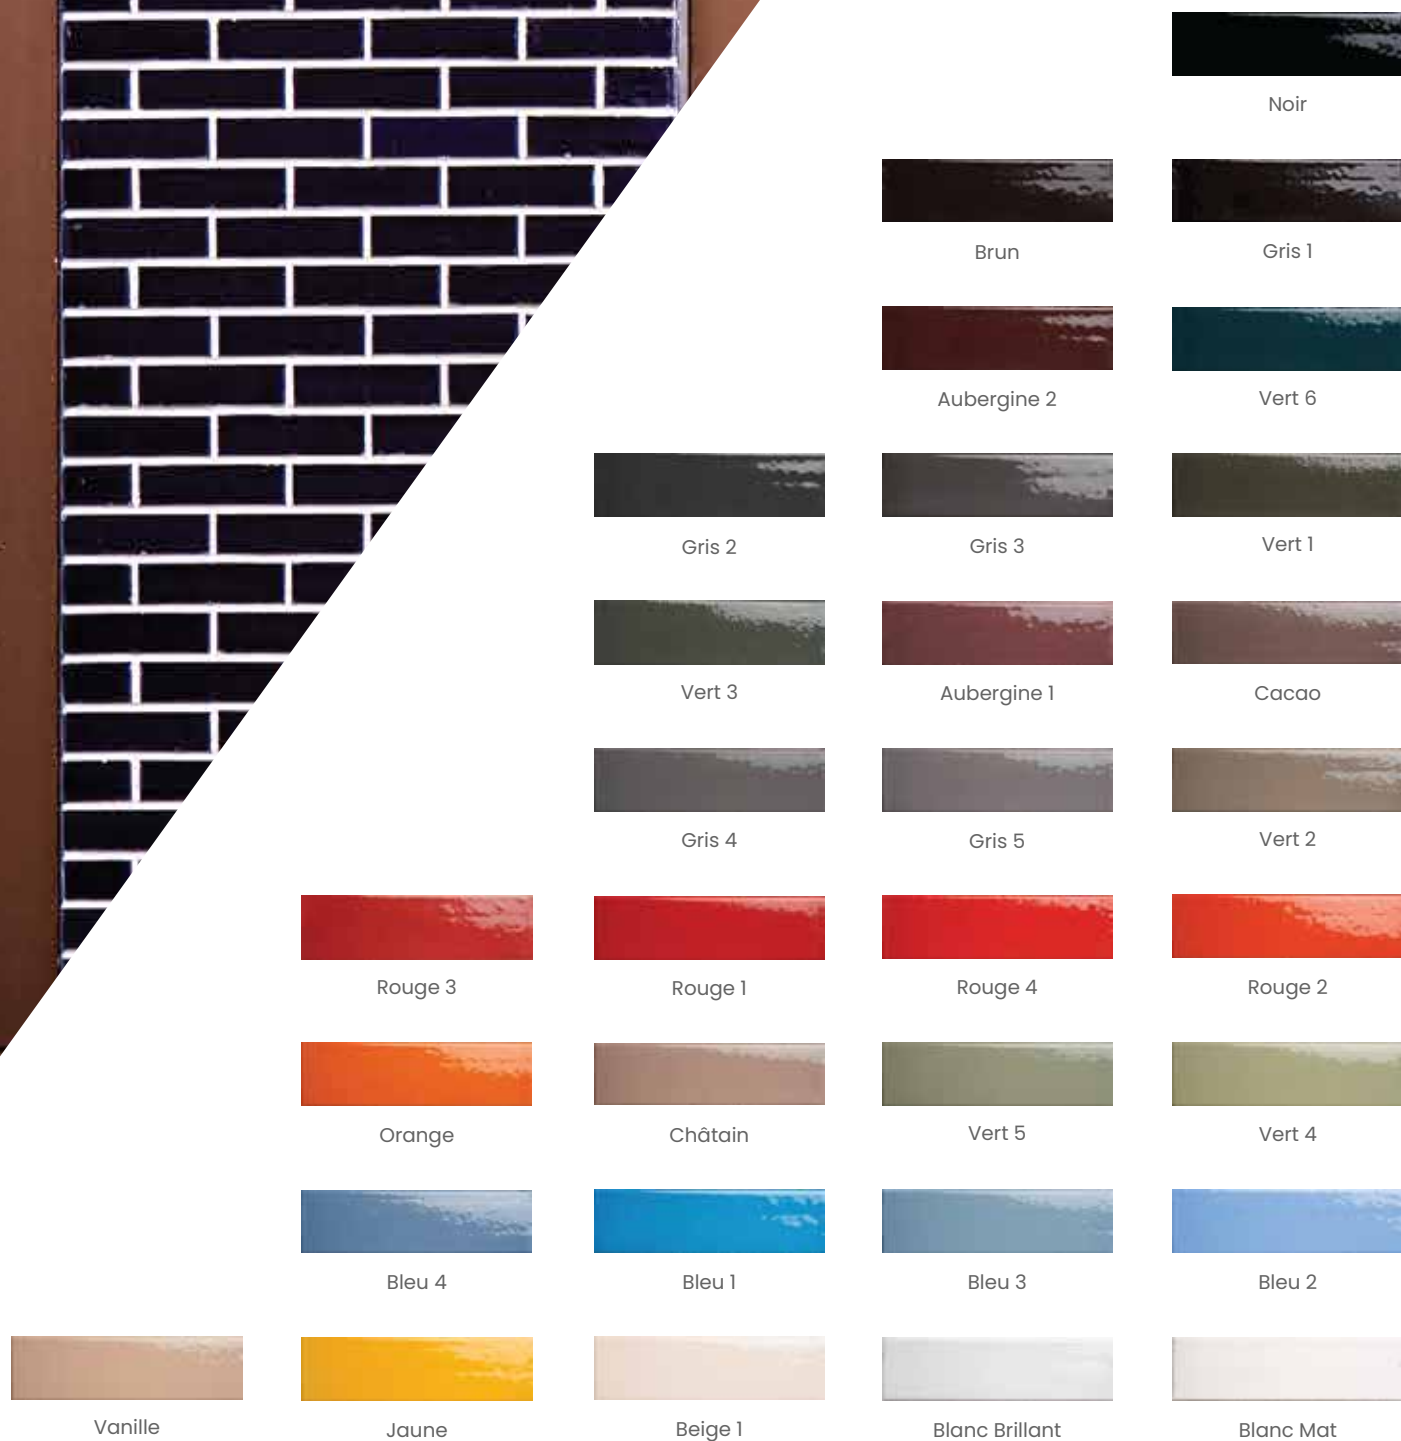

Naturally fire resistant due to the materials and coating used.

Specific shades based on the RAL colour chart can be crafted, in addition to the catalogue of colours.
