Transparent Glazed Bricks

USE: Bricks for External and Internal Façades

Transparent glazed bricks combine the natural colour and variation of terracotta with a reflective glazed surface, creating subtle changes in tone and appearance as light moves across the façade. The transparent finish allows the underlying clay to remain visible while adding depth, sheen and a more distinctive architectural character.

Different transparent finishes can be combined with natural or coloured terracotta to create complementary or contrasting façade treatments. Available in a range of colours, formats and special shapes, these bricks give architects flexibility to develop expressive internal and external façades while coordinating the finish with the wider material palette.

Key Features

Colour that lasts – glazed finishes help maintain rich, consistent colour despite long-term exposure to weather and UV light.

Patterns can be created by combining shapes or angles of bricks that, once assembled, create a variety of finishes depending on the chosen style.

Bespoke shapes and special shapes available.

Glazed bricks are easy to maintain, with their smooth surface making them simple to clean.

Naturally fire resistant due to the materials and coating used.

Specific shades based on the RAL colour chart can be crafted, in addition to the catalogue of colours.
